McCormick & Company, Inc.
2nd Quarter 2020 Financial Results
June 25, 2020

BUILDING THE MCCORMICK OF THE FUTURE
Certain information contained in this presentation, including statements concerning expected performance such as those relating to net sales, gross margins, earnings, cost savings, acquisitions, brand marketing support, special charges, income tax expense and the impact of foreign currency rates are “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. These statements may be identified by the use of words such as “may,” “will,” “expect,” “should,” “anticipate,” “intend,” “believe” and “plan.” These statements may relate to: the impact of COVID-19 on our business, suppliers, consumers, customers, and employees; disruptions or inefficiencies in the supply chain, including any impact of COVID-19; the expected results of operations of businesses acquired by the company, including the acquisition of RB Foods; the expected impact of costs and pricing actions on the company's results of operations and gross margins; the expected impact of productivity improvements, including those associated with our Comprehensive Continuous Improvement (“CCI”) program and global enablement initiative; expected working capital improvements; expectations regarding growth potential in various geographies and markets, including the impact from customer, channel, category, and e-commerce expansion; expected trends in net sales and earnings performance and other financial measures; the expected timing and costs of implementing our business transformation initiative, which includes the implementation of a global enterprise resource planning (ERP) system; the expected impact of accounting pronouncements; the expected impact of the U.S. Tax Act enacted in December 2017; the expectations of pension and postretirement plan contributions and anticipated charges associated with such plans; the holding period and market risks associated with financial instruments; the impact of foreign exchange fluctuations; the adequacy of internally generated funds and existing sources of liquidity, such as the availability of bank financing; the anticipated sufficiency of future cash flows to enable the payments of interest and repayment of short- and long-term debt as well as quarterly dividends and the ability to issue additional debt or equity securities; and expectations regarding purchasing shares of McCormick's common stock under the existing repurchase authorizations.

These and other forward-looking statements are based on management's current views and assumptions and involve risks and uncertainties that could significantly affect expected results. Results may be materially affected by factors such as: the company's ability to drive revenue growth; damage to the company's reputation or brand name; loss of brand relevance; increased private label use; product quality, labeling, or safety concerns; negative publicity about our products; actions by, and the financial condition of, competitors and customers; the longevity of mutually beneficial relationships with our large customers; the ability to identify, interpret and react to changes in consumer preferences and demand; business interruptions due to natural disasters or unexpected events or public health crises, including COVID-19; issues affecting the company's supply chain and raw materials, including fluctuations in the cost and availability of raw and packaging materials; government regulation, and changes in legal and regulatory requirements and enforcement practices; the lack of successful acquisition and integration of new businesses, including the acquisition of RB Foods; global economic and financial conditions generally, including the impact of the exit of the U.K. from the European Union (Brexit), availability of financing, interest and inflation rates, and the imposition of tariffs, quotas, trade barriers and other similar restrictions; foreign currency fluctuations; the effects of increased level of debt service following the RB Foods acquisition as well as the effects that such increased debt service may have on the company's ability to borrow or the cost of any such additional borrowing, our credit rating, and our ability to react to certain economic and industry conditions; impairments of indefinite-lived intangible assets; assumptions we have made regarding the investment return on retirement plan assets, and the costs associated with pension obligations; the stability of credit and capital markets; risks associated with the company's information technology systems, including the threat of data breaches and cyber-attacks; the company's inability to successfully implement our business transformation initiative; fundamental changes in tax laws; including interpretations and assumptions we have made, and guidance that may be issued, regarding the U.S. Tax Act enacted on December 22, 2017 and volatility in our effective tax rate; climate change; infringement of intellectual property rights, and those of customers; litigation, legal and administrative proceedings; the company's inability to achieve expected and/or needed cost savings or margin improvements; negative employee relations; and other risks described in the company's filings with the Securities and Exchange Commission.

Actual results could differ materially from those projected in the forward-looking statements. The company undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law.

### COVID-19 UPDATE

**COMMITMENT TO MAINTAINING CRITICAL FOOD SUPPLY AND SUPPORTING COMMUNITIES**

#### THREE PRIORITIES SINCE FIRST DAYS
- Ensure health and safety of our employees and the quality and integrity of our products
- Keep our brands and customers’ brands in supply and to maintain our financial strength
- Emerge stronger from this crisis

#### STATUS OF BUSINESS
- Hubei province in **early stages** of recovery
- Rest of China fairly **far along** in recovery
- Rest of APZ & EMEA varies by market – some **early stages** of recovery
- Americas in **early stages** recovery
## COVID-19 SEGMENT UPDATE

### CONSUMER

**SECOND QUARTER**
- Initial pantry stocking in Americas and EMEA
- Pantry replenishment in China
- Strong real incremental consumption as quarter progressed

**EXPECTATIONS**
- Shift in consumer consumption to at home continues
- Consumption remains elevated, but not as high as 2Q
- Benefit during a recessionary period based on history

### FLAVOR SOLUTIONS

**SECOND QUARTER**
- Packaged food companies performance varied by customer; early surge tapered off
- COVID-19 measures reduced foodservice customer demand; recovery beginning late in quarter

**EXPECTATIONS**
- Packaged food company demand consistent with levels before COVID-19
- Foodservice gradual recovery varying by market
  - Quick Service Restaurants (QSR) recovering quicker
  - Other foodservice building more slowly
FOCUSED ON EXECUTION

CONFIDENT IN OUR CAPABILITIES TO PERFORM IN THIS DYNAMIC ENVIRONMENT

GLOBAL SUPPLY CHAIN

- Global sourcing has been a real differentiator
- Manufacturing operations pressure
  - Sustained high level of consumer demand
  - New safety and flexibility measures
- U.S. manufacturing capacity addition in second half

UNCERTAINTY DRIVEN BY COVID-19

- Evolving operating environment
- Consumer comfort in eating away from home variation
- Pacing of foodservice re-openings across geographies
- Possible impact of resurgences

Balanced Use of Cash

- Drive growth
- Return to shareholders
- Pay down debt

- **Cash flow provided from operations** $356 million vs $314 million in 2019
- **Cash conversion cycle improved** 6 days from 2019 year end
- Returned $165 million of **cash to shareholders** through dividends
- **Capital expenditures** of $87 million through second quarter
- $500 million **bond issuance** at 2.5% interest rate with 10 year term
- **Projecting strong 2020 cash flow**
**EXPECTATIONS FOR BALANCE OF YEAR**

**HIGH LEVEL OF UNCERTAINTY AROUND THE PACE AND SHAPE OF COVID-19 RECOVERY**

**DEMAND EXPECTATIONS**

- Elevated consumer segment demand to continue at some level
- Packaged food customers demand in flavor solutions to return to pre COVID-19 levels
- Away from home products in flavor solutions portfolio gradually rebounds, but not to 2019 level
- COVID-19 impact in China to reduce global net sales 1%-2% for fiscal 2020
- Favorable mix shift to continue, but moderate

**OTHER KEY EXPECTATIONS**

- Incremental COVID-19 costs to continue, more heavily weighted to 3Q
- Mid-single digit cost inflation
- CCI savings of approximately $105 million
- Mid-single digit increase in brand marketing
- Negative impact from foreign exchange rates for fiscal 2020
- High to mid-single digit decline in income from unconsolidated operations
SECOND QUARTER KEY TAKEAWAYS

- **Second quarter** results speak to the value of our products and our capabilities as a company.
- **Executing during volatility** highlights our agility and strong foundation.
- **Focus** on long-term strategies, consumer behavior and accelerated trends will enable us to emerge stronger.
- **Confident in ability to perform** in dynamic environment and continue on growth trajectory.
- Committed to long-term financial objectives.
The following slides accompany a June 25th, 2020, earnings release conference call. This information should be read in conjunction with the press release issued on that date.
The tables below include financial measures of adjusted operating income, adjusted operating income margin, adjusted income tax expense, adjusted income tax rate, adjusted net income and adjusted diluted earnings per share, each excluding the impact of special charges for each of the periods presented. Adjusted operating income, adjusted operating income margin, adjusted income tax expense, adjusted income tax rate, adjusted net income and adjusted diluted earnings per share represent non-GAAP financial measures which are prepared as a complement to our financial results prepared in accordance with United States generally accepted accounting principles. These financial measures exclude the impact, as applicable, of the following:

In our consolidated income statement, we include a separate line item captioned “Special charges” in arriving at our consolidated operating income. Special charges consist of expenses associated with certain actions undertaken by the company to reduce fixed costs, simplify or improve processes, and improve our competitiveness and are of such significance in terms of both up-front costs and organizational/structural impact to require advance approval by our Management Committee. Upon presentation of any such proposed action (including details with respect to estimated costs, expected benefits and expected timing) to the Management Committee and the Committee’s advance approval, expenses associated with the approved action are classified as special charges upon recognition and monitored on an on-going basis through completion.

We believe that these non-GAAP financial measures are important. The exclusion of the items noted above provides additional information that enables enhanced comparisons to prior periods and, accordingly, facilitates the development of future projections and earnings growth prospects. This information is also used by management to measure the profitability of our ongoing operations and analyze our business performance and trends.

These non-GAAP financial measures may be considered in addition to results prepared in accordance with GAAP, but they should not be considered a substitute for, or superior to, GAAP results. In addition, these non-GAAP financial measures may not be comparable to similarly titled measures of other companies because other companies may not calculate them in the same manner that we do. We intend to continue to provide these non-GAAP financial measures as part of our future earnings discussions and, therefore, the inclusion of these non-GAAP financial measures will provide consistency in our financial reporting. A reconciliation of these non-GAAP financial measures to the related GAAP financial measures is provided below:

1) Adjusted operating income margin is calculated as adjusted operating income as a percentage of net sales for each period presented.

2) Adjusted income tax rate is calculated as adjusted income tax expense as a percentage of income from consolidated operations before income taxes excluding special charges or $229.0 million and $179.1 million for the three months ended May 31, 2020 and 2019, respectively.
Because we are a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. Those changes have been volatile over the past several years. The exclusion of the effects of foreign currency exchange, or what we refer to as amounts expressed "on a constant currency basis", is a non-GAAP measure. We believe that this non-GAAP measure provides additional information that enables enhanced comparison to prior periods excluding the translation effects of changes in rates of foreign currency exchange and provides additional insight into the underlying performance of our operations located outside of the U.S. It should be noted that our presentation herein of amounts and percentage changes on a constant currency basis does not exclude the impact of foreign currency transaction gains and losses (that is, the impact of transactions denominated in other than the local currency of any of our subsidiaries in their local currency reported results).

Percentage changes in sales and adjusted operating income expressed in "constant currency" are presented excluding the impact of foreign currency exchange. To present this information for historical periods, current period results for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the average exchange rates in effect during the corresponding period of the prior fiscal year, rather than at the actual average exchange rates in effect during the current fiscal year. As a result, the foreign currency impact is equal to the current year results in local currencies multiplied by the change in the average foreign currency exchange rate between the current fiscal period and the corresponding period of the prior fiscal year. Constant currency growth rates follow:
