Forward-looking Information

Certain information contained in this presentation and our remarks, including statements concerning expected performance such as those relating to net sales, earnings, cost savings, special charges, acquisitions, brand marketing support, volume and product mix, and income tax expense are "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. These statements may be identified by the use of words such as "may," "will," "expect," "should," "anticipate," "intend," "believe" and "plan." These statements may relate to: the impact of COVID-19 on our business, suppliers, consumers, customers, and employees; disruptions or inefficiencies in the supply chain, including any impact of COVID-19; the expected results of operations of businesses acquired by the company, including the acquisition of RB Foods; the expected impact of raw material costs and pricing actions on the company's results of operations and gross margins; the expected impact of productivity improvements, including those associated with our Comprehensive Continuous Improvement ("CCI") program and global enablement initiative; expected working capital improvements; expectations regarding growth potential in various geographies and markets, including the impact from customer, channel, category and e-commerce expansion; expected trends in net sales and earnings performance and other financial measures; the expected timing and costs of implementing our business transformation initiative, which includes the implementation of a global enterprise resource planning system; the expected impact of accounting pronouncements; the expected impact of the U.S. Tax Act enacted in December 2017; the expectations of pension and postretirement plan contributions and anticipated charges associated with those plans; the holding period and market risks associated with financial instruments; the impact of foreign exchange fluctuations; the adequacy of internally generated funds and existing sources of liquidity, such as the availability of bank financing; the anticipated sufficiency of future cash flows to enable the payments of interest and repayment of short- and long-term debt as well as quarterly dividends and the ability to issue additional debt or equity securities; and expectations regarding purchasing shares of McCormick's common stock under the existing repurchase authorizations.

These and other forward-looking statements are based on management's current views and assumptions and involve risks and uncertainties that could significantly affect expected results. Results may be materially affected by factors such as: the company's ability to drive revenue growth; damage to the company's reputation or brand name; loss of brand relevance; increased private label use; product quality, labeling, or safety concerns; negative publicity about our products; actions by, and the financial condition of, competitors and customers; the longevity of mutually beneficial relationships with our large customers; the ability to identify, interpret and react to changes in consumer preferences and demand; business interruptions due to natural disasters unexpected events or public health crises, including COVID-19; issues affecting the company's supply chain and raw materials, including fluctuations in the cost and availability of raw and packaging materials; government regulation, and changes in legal and regulatory requirements and enforcement practices; the lack of successful acquisition and integration of new businesses, including the acquisition of RB Foods; global economic and financial conditions generally, including the pending exit of the U.K. from the European Union ("Brexit"), availability of financing, interest and inflation rates, and the imposition of tariffs, quotas, trade barriers and other similar restrictions; foreign currency fluctuations; the effects of increased level of debt service following the RB Foods acquisition as well as the effects that such increased debt service may have on the company's ability to borrow or the cost of any such additional borrowing, our credit rating, and our ability to react to certain economic and industry conditions; impairments of indefinite-lived intangible assets; assumptions we have made regarding the investment return on retirement plan assets, and the costs associated with pension obligations; the stability of credit and capital markets; risks associated with the company's information technology systems, including the threat of data breaches and cyber-attacks; the company's inability to successfully implement our business transformation initiative; fundamental changes in tax laws; including interpretations and assumptions we have made, and guidance that may be issued, regarding the U.S. Tax Act enacted on December 22, 2017 and volatility in our effective tax rate; climate change; infringement of intellectual property rights, and those of customers; litigation, legal and administrative proceedings; the company's inability to achieve expected and/or needed cost savings or margin improvements; negative employee relations; and other risks described in the company's filings with the Securities and Exchange Commission.

Actual results could differ materially from those projected in the forward-looking statements. The company undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law.
Certain disclosures in this presentation and our remarks represent non-GAAP financial measures which are prepared as a complement to our financial measures prepared in accordance with United States generally accepted accounting principles ("GAAP").

We believe that these non-GAAP financial measures are important. The presentation of information on a constant currency basis, the exclusion of special charges, transaction and integration expenses, the non-recurring benefit of the U.S. Tax Act and our net debt to Adjusted EBITDA ratio provide additional information that enables enhanced comparisons to prior periods and, accordingly, facilitates the development of future projections and earnings growth prospects or is a meaningful metric to investors in evaluating our financial leverage. This information is also used by management to measure the profitability of our ongoing operations and analyze our business performance and trends.

These non-GAAP financial measures may be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for, or superior to, GAAP results. In addition, these non-GAAP financial measures may not be comparable to similarly titled measures of other companies because other companies may not calculate them in the same manner that we do. We intend to continue to provide these non-GAAP financial measures as part of our future earnings discussions and, therefore, the inclusion of these non-GAAP financial measures will provide consistency in our financial reporting. A reconciliation of these non-GAAP financial measures to the related GAAP financial measures is provided in the Appendix to this presentation.

QUESTIONS & ANSWERS
CLOSING REMARKS
FLAVORING A BETTER TOMORROW
Because we are a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. Those changes have been volatile over the past several years. The exclusion of the effects of foreign currency exchange, or what we refer to as amounts expressed "on a constant currency basis", is a non-GAAP measure. To present the compounded annual growth rates ("CAGR") percentages in sales, adjusted operating income and adjusted earnings per share on a constant currency basis, sales and adjusted operating income and adjusted net income for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the company's budgeted exchange rates for 2020 for all periods. This calculation is performed to arrive at adjusted earnings per share on a constant currency basis by dividing adjusted net income by historical shares outstanding for the applicable fiscal year.

The following provides a reconciliation of our actual CAGR and constant currency CAGR through 2019 follows:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>

</table>
Because we are a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. Those changes have been volatile over the past several years. The exclusion of the effects of foreign currency exchange, or what we refer to as amounts expressed “on a constant currency basis”, is a non-GAAP measure. We believe that this non-GAAP measure provides additional information that enables enhanced comparison to prior periods excluding the translation effects of changes in rates of foreign currency exchange and provides additional insight into the underlying performance of our operations located outside of the U.S. It should be noted that our presentation herein of amounts and percentage changes on a constant currency basis does not exclude the impact of foreign currency transaction gains and losses (that is, the impact of transactions denominated in other than the local currency of any of our subsidiaries in their local currency reported results).

Percentage changes in sales and adjusted operating income expressed in “constant currency” are presented excluding the impact of foreign currency exchange. To present this information for historical periods, current period results for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the average exchange rates in effect during the corresponding period of the prior fiscal year, rather than at the actual average exchange rates in effect during the current fiscal year. As a result, the foreign currency impact is equal to the current year results in local currencies multiplied by the change in the average foreign currency exchange rate between the current fiscal period and the corresponding period of the prior fiscal year. Constant currency growth rates follow:

<table>
